

POLYMER FRAMED PISTOLS

SAR FIREARMS polymer framed pistols meet the need for both professional and personal purposes. The polymer framed pistols are slim and lightweight and remarkably resistant to corrosion and harsh environmental conditions.

STEEL FRAMED PISTOLS

SAR FIREARMS pistols incorporate military spec standards to maintain reliability and accuracy at the highest levels. The stainless or alloy forged steel frames features are continuously improved by ongoing scientific innovations. Among the SAR Firearms steel framed pistol family is the 2000 model, the standard weapon of the Turkish Army and police force. The K2-45 is one of the few high capacity double stack .45 ACP models in the market. The K12 Sport is preferred by competitive shooters for it's ergonomic grip.
